

Show 20 - The Best Business to Own Now

Discover the Best Business to be in Now!

There's always great benefit to any trend, be it good or bad.

While you might be wondering what in the world is going on right now with the economy, gas at \$4 or more per gallon, and companies laying folks off by the dozen, you might do better thinking about

how to prosper from it all instead.

This downturn in our economy is a TREND, and in any trend you can either get swept away OR you can get on the leading edge of it and reap the benefits from it all.

Think about a surfer - in California they are always in the water waiting for that next wave. If they hit the wave just right, they get to ride it all the way to the shore. If they wait too long, they completely miss out on the ride and have to sit and wait for the next wave to appear.

Right now is the best time for you to position yourself to BENEFIT from the changes that lie ahead for us all.

There are a few choice professions that will actually GROW substantially over the next few years, and that is where you want to be right now. Instead of sitting back hoping that all will be well for you, why not get ahead of the trend and ride it like a champion instead?

This week's show is very different from past shows in that I've got a very SPECIAL GUEST that is here to share some of her thoughts on what I think is the most exciting of all professions - coaching!

Who better to talk about coaching with than the "Guru of Coaching," Terri Levine!

Sit back and be ready to hear much more about coaching as we "peel back the curtain" and get a look at what coaching is really like from the inside!
